EDUCATION

University of North Florida, December 2012 Graduate Bachelor of Science in Communications, minor in Advertising Member of Sigma Chi (ΣX) Fraternity

Jacksonville, FL

EXPERIENCE

Bubbly Brands, December 2019 – February 2023 Senior PHP Developer, June 2022 – February 2023 San Diego, CA

- Lead Developer of the headless Shopify instance using Codelgniter: www.bubblybelle.com
- Shopify Manager: page data, product information/images, product collections, etc.
- Developed custom code for API Integrations with:
 - o Bluesnap.com, for order payment processing and subscription-based ordering.
 - Afterpay.com, for order payments using their delayed-payment program.
 - o Paypal.com, for order payment using our all-in-one customer checkout pages.
 - Shopify.com, for website content (pages, collections, products), and for order placement through funnels and online store.
 - Faire.com, for wholesale customers to place orders and track fulfillment progress.
 - Shiphero.com, for shipping fulfillment and unit inventory tracking.
 - Refersion.com, for influencer and affiliate marketing to support and create UGC.
 - o EZTexting.com, for SMS texting used for marketing and customer outreach.
- Manage updates to internal Admin Website, full of tools which keep track of each individual SKU across all product lines; email and social marketing funnels and all funnel properties; outreach content with all variations; internal A/B testing metrics and winners; send/receive ad hoc SMS messages to our customers; analytics and other customer-based tracking.
- Create a process for Social Media Ambassadors to capture their video product testimonials.
- Create an internal tool to request and present reviews from customers (to replace Loox).
- Manage additions to our Rebiller CRON to capture and process customer subscriptions.
- Create reveal flow which integrates questions to build customer profile and suggest products.

Front-End Web Developer, December 2019 – May 2022

- I made our landing pages 73% lighter and 226% faster by optimizing 137 pages to remove excess code, minify CSS and JS, and reference super global variables.
- Work with Creative Director's UI/UX designs to:
 - Create pixel-perfect landing pages using bootstrap and assets from XD designs.
 - Update the Bubbly Belle website to release quarterly/seasonal product lines.
 - Update quizzes and funnels featuring new seasonal bath bombs and new products.
 - Develop new marketing initiatives like "spin-to-win" flow for customers to win prizes.
 - Develop an "All Products" page with filtering and direct "add-to-cart" functionality.
- Work with Development team to:
 - o Integrate Klaviyo flows starting with an open carts all the way to review the product.
 - o Create and optimize all funnel components with custom code using Shopify API.

Lead Front-End Developer, CannabisDNA.com

- Design, develop, and launch a microsite featuring Pathway's newest DNA test: CannabisDNA.
- Design and implemented a 4-week email drip campaign to those who received gated content explaining who we are, what the test does, and why customer should buy the test.
- Schedule and deploy blog posts from curation scientists to the microsite and create imagery and copy for paid ads to promote these posts within Facebook and Instagram platforms.
- Created and managed Google Ads for CannabisDNA and for Fitness and Nutrition products.
- Create reports to summarize marketing efforts successes, and to summarize sales data, show customer, patient, and office activities occurring in a specific time range.

Asset Marketing Systems (AMS), September 2017 – February 2019 Senior Front-End Web Developer

San Diego, CA

- Using Codelgniter, created individual landing pages for Financial Advisors to promote: gated content, event registration, and product awareness.
- Manage 12 internally hosted custom (non-WordPress) Financial Advisor Websites, in addition to 17 WordPress sites: 3 for internal use, 2 public facing, and 12 for Financial Advisors.
- Created admin dashboard to see overall page hit and link clicking summaries, HubSpot send/view data, Basecamp data, Internal metrics, and team successes.
- Admin dashboard also managed: shortened URLs, tracking pixels, website assets, email distribution schedule, passwords, and inter-departmental messages.
- Participate in brainstorming sessions for the new internal and external marketing initiatives.
- Implement internally designed PSDs into HTML for email campaigns, as well as carrierprovided HTML Emails, into HubSpot and ClickDimensions for email distribution.
- Provide open-rate and click-through summaries on campaigns and suggest design/coding changes on future emails to improve these metrics.
- Create custom/dynamic HubSpot and ClickDimensions templates for emails, with a focus on responsive design, and attention to pixel-perfect detail.

Bank of Cardiff, April 2016 – July 2017

San Diego, CA

Senior Full-Stack PHP Developer

- Rebuilt or added modules of custom CRM using PHP and AJAX, including: call metrics/stats; user management, log in/log out, timesheet reporting; templated email mailer; inbound traffic stats; lead management/distribution.
- Created/optimized landing pages for paid traffic, working with a third-party to select content and execute AB testing.
- Created online small-business loan application, with features: subtle saves for soft leads, sign-with-finger functionality on mobile phones/tablets, SMS success messages, save/resume application, google reCAPTCHA, and how-to video.
- Implemented the "Cardiff Insight Series," a gated-content marketing effort with articles written by industry leaders.

Vast Bridges, November 2014 – December 2015

Jacksonville, FL

Senior Front-End Web Developer, Marketing Department

- Processed HTML/CSS/JavaScript/PHP changes as needed on approximately 80 production sites, over 4 servers, all through Dreamweaver sites.
- Created PSD templates for new production websites; once approved, created pixel-perfect HTML/CSS templates from these PSD files.

- Integrated the complete HTML/CSS with the Codelgniter framework, then deployed the site.
- Created "Outreach Pages," which were interactive using various JavaScript libraries, MySQL DB, and custom PHP, to help drive traffic and increase SEO.
- Redesigned HTML tabular layouts to be responsive CSS layouts, while preserving the design.
- Created the "Vast Bridges Marketing Portal," a central repository for website assets, login information, invoices, project workflows, knowledge base, and more.
- Implemented and analyzed AB testing to optimize our websites and lower bounce rates.

University of North Florida, September 2006 - November 2014

Jacksonville, FL

Webmaster, Department of Housing and Residence Life

- Developing and maintaining the department's two online web portals:
- Housing Admin Portal, which assisted departmental and university staff in many ways
- The Resident Search Utility interfaced with our third-party software which manages residents and assignments, called RMS (Resident Management System), and combined information from several searches on just one screen.
- Assignments staff would view room and/or roommate change requests.
- Accounting staff would see a profile for each residential student showing their submitted
 payment method (payment plan, financial aid, Florida pre-paid, or cash) and they would add
 any communication they shared with the students.
- Residence Life staff had access to staffing calendars, on-call reports, incident reports, fire alarm reports, duty change requests, and other forms.
- Mailroom staff would log the residents' packages as they came in from various carriers, log
 details about the package, send a notification to the student, and had a package pick-up
 process once the resident got to the pick-up window.
- Conduct staff would see all the incidents on campus, which residents were involved, which other conduct-related incidents the resident(s) have also been part of, and which sanctions are assigned to which resident(s) and when they're due.
- There was an administrative section which allowed me to control permissions within the system, and manipulate website content and features within myHousing.
- myHousing, which allowed students to access their housing information online.
- Residents can view their room and roommate information, view invoices, submit rental amount estimates and room change/roommate change request forms.
- Residents can access the Roommate Search System, which allowed residents to create
 profiles and search through other profiles for prospective roommates before choosing their
 room in the RMS' Student Web Self-Assign (SWSA) online process.
- Configure Student Web Self-Assignment process for incoming and returning residents, including video tutorials for how to use SWSA system.
- Designing marketing materials, including: Spinnaker Ads, posters for area-wide programs, full and quarter-sheet flyers, road signs, door wraps, t-shirts, buttons, and the housing website.
- Updating the website to show which Living-Learning Communities are offered, how to apply, what to expect, and user experiences.
- Integrating links to the department's social networking initiatives (Facebook, Twitter, and YouTube) to various parts of the website.
- Attend weekly meetings for campus updates and to discuss inter-departmental initiatives.
- Supporting departmental staff with technology including but not limited to:
 - Install printers, network destinations, and default software for new systems.
 - o My (admin) credentials were required to perform software installations and updates.
 - Handling various error messages which prevent network, internet, or software use.

- Assisting staff in Microsoft Word, Excel, and Outlook tasks.
- o Diagnose computers to determine if they've been compromised and restoring them.

Playfit Enterprises, May 2004 – September 2006

Jacksonville, FL

Webmaster/Multimedia Specialist

- Creating the CSS as well as the website's master template and incorporate after-thought additions to the website template.
- Creating the flash based "PPES Software Flash Demo," which shows an overview of the system, and which user types have access to which portions of the system.
- Creating "Member Preview Areas" to elaborate on the demo by showing examples of the system, how to navigate through the system, and how to get additional help if needed.
- Reviewing website content to ensure compliance with the Associated Press Style Book.
- Developed in-house solutions to: time sheets, phone call logs, and status reporting.

SKILLS

Mastery in the use of: Windows and Mac operating systems, Microsoft Office Suite, Adobe Creative Cloud, cPanel, MySQL Workbench, and Chrome Developer Tools.

Advanced knowledge of: HTML, CSS, Responsive Design, JavaScript, jQuery, PHP, GitHub, Docker, MAMP, WordPress, PHPMailer, and JS libraries: mustache templating, moment.js, etc.

Intermediate knowledge of: Sketch, Angular, Vue.js, ReactJS.
